

Real-time
Monitoring

Track energy usage across buildings, floors, rooms and equipment.

Smart Control

Remotely control and automate devices for optimal energy usage.

Advanced Analytics

Identify wastage, trends and opportunities for savings with actionable insights.

Continuous Savings

Deliver measurable energy savings from Day 1 with data-driven decisions.

Key Features

Real-time
Energy Monitoring

Track consumption across buildings, floors, rooms and critical equipment.

Remote Control
& Automation

Control lights, HVAC and other devices for optimal usage.

Advanced
Analytics & Reports

Identify wastage, trends and savings opportunities.

Alerts &
Notifications

Get real-time alerts on abnormal usage, equipment status and more.

Energy Optimization
Recommendations

Data-driven insights to continuously improve efficiency.

Sustainability
& Compliance

Lower carbon footprint and meet energy management goals.

Scalable & Flexible

Suitable for offices, commercial buildings, industries, campuses and multi-site operations

Business Value

Reduce
Energy Cost

Significant and measurable savings from Day 1.

Improve
Energy Efficiency

Optimize usage and reduce wastage.

Gain
Operational Visibility

Real-time data and centralized monitoring.

Improve
Asset Performance

Proactive monitoring for better reliability and longer equipment life.

Support
Sustainability Goals

Lower carbon footprint and greener operations

Ideal For

Offices

Commercial
Buildings

Industries

Educational
Institutions

Hospitals

Multi-Site
Enterprises
